GENERAL POLYMERS® 3741
NOVO-FLO SOLVENT / ACID RESISTANT COATING

**PRODUCT INFORMATION**

**PRODUCT DESCRIPTION**

GENERAL POLYMERS 3741 NOVO-FLO SOLVENT / ACID RESISTANT COATING is a pigmented, high-build, high solids Novolac epoxy which resists vapor, splash, spillage or immersion to certain aggressive acids, alkalies and solvents. This material bonds aggressively to properly prepared and primed substrates, protecting the substrate from damaging chemicals.

**ADVANTAGES**

- Protects against certain aggressive acids, alkalies and solvents. Refer to the Chemical Resistance Guide.
- High bond strength
- Rapid cure
- Initial high gloss
- Moisture tolerant

**TYPICAL USES**

GENERAL POLYMERS 3741 NOVO-FLO SOLVENT / ACID RESISTANT COATING protects surfaces in petroleum refineries, chemical processing, water treatment, waste water treatment, power utilities, pulp and paper, food and beverage and pharmaceutical facilities.

**LIMITATIONS**

- Slab on grade requires vapor/moisture barrier.
- Substrate must be structurally sound and free of bond inhibiting contaminants.
- During installation and initial cure cycle, substrate and ambient air temperature must be at a minimum of 50°F (10°C). Substrate temperature must be at least 5°F (3°C) above the dew point (for lower temperature installation contact the Technical Service Department).
- When required, adequate ventilation shall be provided and proper clothing and respirators worn.
- Strictly adhere to published coverage rates.

**SURFACE PREPARATION**

Proper inspection and preparation of the substrate to receive resinous material is critical. Read and follow the "Instructions for Concrete Surface Preparation" (Form G-1) for complete details.

**PRODUCT CHARACTERISTICS**

<table>

**Drying Schedule @ 8 mils (200 microns) wet:**

- To touch: 8 hours
- To recoat: 16 hours
- Light traffic: 24 hours minimum
- Full Cure: 7 days

If maximum recoat time is exceeded, abrade surface before recoating. Drying time is temperature, humidity, and film thickness dependent.

**Pot Life:**

- gallon mass: 40 minutes @ 73°F (23°C)
- shelf life: Part A: 36 months, unopened
  - Part B (Standard): 36 months, unopened
  - Store indoors at 50°F (10°C) to 90°F (32°C)

**Flash Point:** >213°F (>100°C), ASTM D 93, mixed

**APPLICATION**

**APPLICATION INSTRUCTIONS**

1. Premix 3741A (resin) using a low speed drill and Jiffy blade. Mix for one minute and until uniform, exercising caution not to whip air into the material.

2. Add 2 parts 3741A (resin) to 1 part 3741B (hardener) by volume. Mix with low speed drill and Jiffy blade for three minutes and until uniform.

3. Apply 3741 using a 1/4” nap roller at a spread rate of 80-160 sq. ft. per gallon evenly, with no puddles making sure of uniform coverage. Take care not to puddle materials and insure even coverage.

4. Allow to cure 24 hours before opening to light foot traffic and water exposure.

Note: Epoxy materials will appear to be cured and “dry to touch” prior to full chemical cross linking. Allow epoxy to cure 2-3 days prior to exposure to water or other chemicals for best performance.

**CLEANUP**

Clean up mixing and application equipment immediately after use. Use toluene or xylene. Observe all fire and health precautions when handling or storing solvents.

**SAFETY**

Refer to the MSDS sheet before use.

Published technical data and instructions are subject to change without notice. Contact your Sherwin-Williams representative for additional technical data and instructions.

**MAINTENANCE**

Occasional inspection of the installed material and spot repair can prolong system life. For specific information, contact the Technical Service Department.

**SHIPPING**

- Destinations East of the Rocky Mountains are shipped F.O.B. Cincinnati, Ohio.
- Destinations West of the Rocky Mountains are shipped F.O.B. Victorville, California.

For specific information relating to international shipments, contact your local sales representative.

**DISCLAIMER**

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative to obtain the most recent Product Data Information and Application Bulletin.

**WARRANTY**

The Sherwin-Williams Company warrants our products to be free of manufacturing defects in accord with applicable Sherwin-Williams quality control procedures. Liability for products proven defective, if any, is limited to replacement of the defective product or the refund of the purchase price paid for the defective product as determined by Sherwin-Williams. NO OTHER WARRANTY OR GUARANTEE OF ANY KIND IS MADE BY SHERWIN-WILLIAMS, EXPRESSED OR IMPLIED, STATUTORY, BY OPERATION OF LAW OR OTHERWISE, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

For comprehensive chemical resistance information, consult the Chemical Resistant Guide and contact the Technical Service Department.
